EDUCATION

National Textile University
Computer Science Bachelors
CGPA: 3.76

Faisalabad, Pakistan
2023 - 2027

SKILLS

Programming Languages: Typescript, JavaScript, Dart, C++
Libraries/Frameworks: React, Tailwind CSS, Flutter
Tools / Platforms: Git, GitHub, VS Code
Databases: mySQL, MongoDB

PROJECTS / OPEN-SOURCE

Positivus Landing Page (Figma to Code) | [Link](#)

React, TailwindCSS

Recreated a Figma community landing page design pixel-for-pixel using React and Tailwind CSS v4, with exact design tokens from Figma's Styles panel into clean, maintainable React code.

- Built fully responsive layouts (mobile-first) with custom breakpoints matched to Figma frames
- Implemented interactive components using React state
- Extended the static design with custom CSS animations and micro-interactions
- Structured the codebase around reusable, prop-driven components to avoid repeated markup

Hisaab SaaS Invoicing Landing Page | [Link](#)

HTML5, Tailwind CSS v4

Designed and built a professional, responsive landing page for a concept invoicing platform aimed at Pakistani freelancers, supporting PKR/USD and local + international payments

- Designed a sticky navbar with a glassmorphism effect and a hero section featuring a live invoice dashboard mockup
- Created pricing, testimonials, and feature sections styled entirely with Tailwind CSS v4

Dessert Caf Ordering App | [Link](#)

HTML, Tailwind CSS, Vanilla JavaScript

Designed and built a fully responsive, single-page ordering website where customers browse products by category, manage a cart in real time, and check out with a generated order receipt

- Added customer signup/login with persistent sessions, so users stay logged in across visits
- Designed a warm, cohesive visual identity custom color palette and typography with a mobile-first layout throughout
